# Economics 792: Labour Economics Provisional Outline, Spring 2018

This course will cover a number of topics in labour economics. Guidance on readings will be given in the lectures. There will be a number of problem sets throughout the course (where group work is encouraged), presentations, and a research paper/proposal. These, together with class participation, will determine your final grade. The research paper will be *optional*. Students not submitting a paper will receive a lower grade. *Small* group work may be permitted on the research paper with the instructors approval, although all students must make substantive contributions to any paper.
